

Building Systems for the 21st Century

Thin Coat “Reinforced” Flexible Render System

For use on individual elevations or the entire property. The finished result is crisp and clean – “as good as new” – but vastly superior to traditional sand and cement render. Will not crack or degrade – guaranteed!

Can be applied with or without external wall insulation.

THE BENEFITS

Specifically designed for the renovation of traditional sand and cement render and pebbledash which has come to the end of its life or is too far gone for cosmetic repair. Applied in the same way as traditional render but **mesh reinforced + mechanical fixings**.

- DOES NOT REQUIRE REMOVAL OF EXISTING RENDER
- CAN BE APPLIED TO ALL SUBSTRATES INCLUDING BRICK AND PEBBLEDASH
- EXCELLENT UNIFORM FINISH IN KEEPING WITH PERIOD PROPERTIES
- VERY FLEXIBLE – GUARANTEED NOT TO CRACK, 10 YEAR GUARANTEE
- EXCEPTIONAL WEATHERPROOFING PROPERTIES
- GUARANTEED TO STOP PENETRATING DAMP
- VAPOUR PERMEABLE – ALLOWS THE RELEASE OF EXISTING MOISTURE
- THROUGH COLOURED – DOES NOT NEED PAINTING
- FULL RANGE OF COLOURS AVAILABLE
- COST EFFECTIVE

For your added assurance PPJ Construction is an approved contractor for the Trading Standards “Buy with Confidence Scheme”.

“What a transformation! Top quality workmanship and the building looks like new”
